

Frequently Asked Questions

1 Is PROPEL clinically proven?

PROPEL's safety and efficacy is backed by the highest level of clinical evidence.¹ Over 150,000 people have been treated with PROPEL.

2 Will I feel PROPEL in my sinus?

PROPEL is lightweight and usually cannot be felt once in place.

3 What should I do after the procedure?

Always follow your doctor's instructions. Frequent saline irrigations are important for post-surgical healing.

The PROPEL sinus implants are intended for use following sinus surgery to maintain the sinus openings and to locally deliver a drug to the sinuses: PROPEL for use in the ethmoid sinus, PROPEL Mini for use in the ethmoid sinus and frontal sinus opening and PROPEL Contour for use in the frontal and maxillary sinus openings. The products are intended for use in patients ≥ 18 years of age. These products are not intended for people who are allergic to the drug (mometasone furoate) or to certain polymers. Safety and effectiveness of the implant in pregnant or nursing females have not been studied. Risks may include, but are not limited to, pain/pressure, movement of the implant (within or out of the sinus), possible side effects of the drug, infection, and nose bleed. For more information on the risks and benefits of PROPEL sinus implants, please talk to your doctor. The FDA approved labeling can be found at www.IntersectENT.com. Rx only.

Chronic Sinusitis Relief

THERE'S HOPE. 

PROPEL[®]

MOMETASONE FUROATE SINUS STENT

Shown to improve the results of sinus surgery.¹

Don't Just Treat the Symptoms. Treat the Source.

Sinus surgery with PROPEL is clinically proven to provide relief by targeting **inflammation**², the primary characteristic of chronic sinusitis.

PROPEL sinus stent

1 OPENS

After sinus surgery, PROPEL is placed to help prop open the sinus.

2 DELIVERS

PROPEL delivers medicine directly to the sinus to help reduce inflammation that could block the opening.

3 DISSOLVES

As the sinus heals open, PROPEL is designed to dissolve within 45 days.

Sinus Surgery Has Advanced

If you and your physician have discussed sinus surgery, be assured that it is easier and less invasive than ever before.

Small instruments are introduced through the nostrils to open sinuses blocked by inflammation.

Uncomfortable gauze packing is a thing of the past.

PROPEL is placed in the sinus after surgery to promote healing and reduce the need for additional procedures.
